Elden Ring is an online RPG developed by Vanillaware and is the newest game in the NOVA series, which also includes the successful Dragon's Crown, Shadow of the Colossus, and Odin's Sphere. In Elden Ring, players are placed in the middle of a huge world full of excitement. SYSTEM 1. Create Your Character For the convenience of controlling your character easily and having the equipment you want, the game features a highly customizable character system. Using a visual template, you can easily modify the appearance of your character to freely change his appearance, head, and body shape. Although the parts that are not locked are linked, it is possible to change them freely. If you want to unlock the unchangeable parts, the game will provide you with the original models, and you can unlock them by purchasing the corresponding parts. In addition to customizing the appearance of your character, the character skills that you equip are also customized. You are given three main skills that serve as basic skills: Strength, Intelligence, and Magic. Equipping an appropriate skill unlocks the ability to use that skill, and playing makes you increase the level of the skill. 2. Explore a Vast World Elden Ring is a completely open world RPG, and there are no "familiar places" like those in previous titles. While you are exploring the world, monsters will be displayed for you to fight, and some unique enemies with various abilities will appear. Furthermore, you can win various types of monsters, and they will change their appearance depending on the circumstances. It is possible to obtain a "Power" monster as a reward for completing the "Tempest" ritual. The large and rich world and the variety of quests and events make it feel as though you are actually exploring a vast world and that your adventure never ends. 3. Asynchronous Online Communication In addition to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others. All

players can be connected to each other by a private messenger. You can see the messages that others send to you or leave in their quest log, and you will be able to see their latest game events. ABOUT ELDEN RING PLAYER Player's name: EirikAge: 19 Work Experience:

As you progress in the game, you will obtain power which you can use in battles with monsters and other players. In battles, "Brute Force" plays a key role, and the "Battle System" which allows for smooth, impactful battles that enable both side quests and main quests. Additionally, through the "Stages" system

that controls the battles and the acquisition of items, when you go through stages in which your power is low, you will have to "restore" which will have a certain effect on the battles you conduct in the stages afterward. The governor of South Africa's Western Cape Province had asked the U.S. Embassy to convey a message to the South African government that he understood the passion and anger of religious leaders who want retribution for the violence against blacks by predominantly white religious groups, the president said. The gathering of leaders from a variety of religions ``demonstrates the power of the belief in God,'' Bush said as he opened the two-day meeting of some 100 religious leaders, political leaders, and concerned citizens from South Africa. The South African government is more concerned that the exchange of violence and prayers is ``perpetuating the cycle of hatred'' than about incitement of the violence, a South African government official said this morning, in response to an exchange of insults between President PW Botha and Mugabe, leader of Zimbabwe. The official said that a meeting with Mr. Mug

I understand that by calling $("li").draggable() I am making the entire list draggable. I also want the item to move to a specific location. How can I have the elements in my list move to a specific location on click, and then be moved as the user drags the entire list. I don't want the user to be able to drag the items. This is code that works, however the objects are not moved to a new list when I click the item. Is there something I'm missing? $("#element").draggable(); $("#drop").droppable({ drop: function(event, ui) { var element = $(ui.draggable); $(this).append(element); }, over: function(event, ui) { $(this).addClass("over"); $(this).addClass("ui-state-hover"); }, out: function(event, ui) { $(this).removeClass("over"); $(this).removeClass("ui-state-hover"); }, handle: '.handle' }); A: You can append the element like this: $(function(){ var element = '#element'; $('#drop').droppable({ drop: function(event, ui) { $(this).append(

Those who are familiar with previous installments of World of Warcraft will be quite familiar with the basic premise of Tarnished. Players will be exploring the lands of Lythe and Elwynn, and must gather the power of the Elden Ring (a sort of magical artifact that was created thousands of years ago by the ancient civilizations of the Elden Ring's creators) to be able to defeat the upcoming threat of The Alds. While adventuring throughout these lands, players will need to uncover the secrets behind the Alds, and solve the mystery surrounding the Tarnished One, a dark and powerful being who rules over the Alds. In order to accomplish this, players will be able to take on one of 3 very distinct paths in the game. Either they can choose to be a Warrior (a strong and battle-tested warrior who will wield a two-handed war axe for traversal and striking power), a Mage (an accomplished spellcaster who can power up their abilities to enhance their attacks and create protections), or an Explorer (a powerful dual wielder who can dodge attacks, unleash powerful ranged attacks, climb walls, and read and repair equipment). While the Warrior and Explorer paths are given by default and both are fairly straightforward, it is possible to do the Mage path, which starts you as a lower level mage. As players fight and explore, they will be able to encounter a variety of monsters, structures, and things for them to interact with. Players can have their characters gain more**
